

# Mike Brunson

*“The journey continues...”*

The fire in Mike Brunson was ignited while taking a college ceramic course but was not fully re-kindled until almost twenty-five years later when he was reintroduced to clay.

His experience working in the reduction (gas), raku, wood fire and oxidation (electric) world of firing his creations shows in his ability to create oh-so-lovely glazes on his amazing art.

Mike has received numerous awards, was past president of the Arizona Clay Association, past Guest Artist in the ASU/CRC ceramic studio tour and sold in art festivals and art galleries.
